Education

Navkis College of Engineering
B.E. in Computer Science (**CGPA**: 7.82)

Hassan, Karnataka
2022 – 2026

MASVS GURUKULA PU COLLEGE
PCMB (62.5%)

Mysore, Karnataka
2020 – 2022

Profile Summary

Detail-oriented Aspiring Computer Science and Engineering student with a strong foundation in Java and web technologies, eager to begin a professional career by gaining hands-on experience and contributing to software development in a dynamic environment, contribute effectively to software development projects..

Skills

Programming Language: Python

Frameworks and Library: Pandas, NumPy, Matplotlib, Flask

Tools and Technology: Git, GitHub, Jupyter Notebook, Power BI, Tableau

Database: MySQL, MongoDB

Projects

Medical Data Encryption |

- Medical data encryption is a cybersecurity technique that protects sensitive patient information by converting it into unreadable code. It ensures that only authorized users with the correct decryption key can access the data. Encryption helps prevent unauthorized access, data breaches, and cyberattacks on healthcare systems. This improves patient privacy and supports compliance with healthcare data protection regulations..

Tourist Guide |

- Provides detailed information about tourist destinations, local culture, historical landmarks, cuisine, transportation, and accommodation options through an interactive interface. Enhances the travel experience by offering maps, recommended itineraries, nearby attractions, and practical travel tips for efficient exploration. Promotes sustainable tourism by encouraging responsible travel practices and highlighting eco-friendly options, while delivering an engaging user experience with digital media and photography .

Data Universe Manager |

- Data universe manager involves collecting, storing, processing, and managing large volumes of data through full stack applications. Front-end technologies provide user-friendly interfaces for accessing and visualizing data. Back-end systems handle data processing, business logic, and secure database operations. Full stack development enables efficient data management, real-time access, and seamless integration across different platforms .

Accomplishments

- * Completed Certification from **Infosys Spring board** in Cloud Computing, C++, Data Structure and Algorithm in Python.
- * Completed a Certification from **NPTEL** in Internet of Things.

Extracurricular Activities

- * Participates in hackathons and cultural events to enhance creativity and teamwork skills.
- * Promoting teamwork and leadership qualities, and Travell Management and Editing skills.
- * Actively takes part in workshops to strengthen technical knowledge and interpersonal skills.
